Amendments to the Abstract:

Please replace the original Abstract with the Substitute Abstract filed herewith. No new matter is added.

ABSTRACT

An assembly for supplying a detergent in a washing machine is provided, by which a detergent box can be correctly installed in the washing machine. The assembly includes a receiving part provided in an upper space of the washing machine having an opening at a front side thereof, a detergent box detachably received in the receiving part via the opening, a drawer panel installed at a front side of the detergent box to form an exterior of the washing machine, and a location correction device for correction of a reception location of the detergent box.
